Title (English)		<b>Challenges in the Swedish Drug Development Environment – a study of the delay between preclinical and clinical trials</b>	
Title (Swedish)			
Abstract		<p>Based on yearly pipeline studies conducted by SwedenBIO in collaboration with Invest Sweden and VINNOVA, a transitional delay between late pre-clinical research and the initiation of clinical trials has been observed for a majority of micro- and small-sized pharmaceutical and biotechnology companies. The objective of this study was to identify the main forces being of particular influence to the early drug development process that could explain these observed delays.</p>
